

ADVANTAGES

- Allows on-line filter replacement of earlier stages
- Suitable for high velocity applications
- Guard filter in combination with a high velocity bag filter

Application	Suitable for all environments including high velocity air inlet systems. Typical for coastal and offshore installations Pre-filter for gas turbines, large industrial air compressors, diesel & gas engines, generators & enclosures
Frame	Stainless steel
Gasket	Flat gasket
Media	Synthetic
Rec. final pressure drop	250 Pa
Max Temperature (°C)	70°C
Relative Humidity max	100%
Installation Options	Between bag filter and filter-bank
Comment	Additional information: Designed for use in combination with Cam-Flo GT HV. Product Features: Durable media Low pressure drop Allows on-line filter replacement Reduced overall TCO Solid corrosion-resistant frame in stainless steel Designed for use in combination with Cam-Flo GT HV

The CamGuard is a coarse filter that is installed downstream of the Cam-Flo GTX7, allowing online filter replacement thus reducing costly downtime.
